host via water, food, milk, blood, serum, or plasma. Diseases of human or animal origin caused by an infectious agent and resulting from transmission of that agent from an infected person, animal, or inanimate source to a susceptible host.

Community Chapter 26 Flashcards | Quizlet

Get Free Bioterrorism And Infectious Agents A New Dilemma For The 21st Century

A biological attack, or bioterrorism (BT), is the intentional release of viruses, bacteria, or other germs that can sicken or kill people. Bacillus anthracis, the bacteria that causes anthrax, is one of the most likely agents to be used in a biological attack. Anthrax is one of the most likely agents to be used because:
