The General Motors J platform, or J-body, is an automobile platform that was used by General Motors from 1981 to 2005. Marking the transition to front-wheel drive in the compact-car segment in North America, the J platform was the successor to the H platform, making it the third generation of compact cars designed by the company. Outside North America, the J platform was adopted by GM-controlled subsidiaries making the same transition to front-wheel drive, though as a mid-size car.
