Balanced Line Tuner (BLTPlus) - Pacific Antenna - QRP Kits

While browsing around for QRP tuners, the Z-Match caught my attention. The Z-match network was originally described by R. W. Johnson, W6MUR in the July 1954 edition of the QST magazine published by the ARRL. It met my requirements stated above and it was a proven tuner network.

Homebrew Antenna Tuner - A Best of Breed Version

Then I picked up an EMTECH ZM-2 QRP Z-Match tuner (www.emtech.steadynet.com). These are sold in kit form. After building it to go along with my portable QRP rig, I became a real believer in Z-Match tuners. Now, my goal was to build a Z-Match tuner that was relatively small and portable, and yet would handle the 100-watt output power of my IC ...

Tuners - QRPGuys

The Emtech ZM-2 Antenna Tuner is a nifty little portable transmatch for QRP (low power). It utilizes the well-known Z-match circuit, which is especially useful for balanced antennas (like dipoles and loops). Since it's a very inexpensive kit (around \$50), and because there's an constant clatter about it on the QRP-L mail list, and because I travel a lot and need the miniature equipment, I ...

Emtech ZM-2 Antenna Tuner Kit (N5ESE Version)

Z-Match aircore antenna tuner test version

This is where the L-Match tuner comes in. An L-Match tuner is a device that can add either inductance (L) or capacitance (C) to the antenna, bridging that gap between 5000 ohms and 50 ohms, thus matching it to the radio. The L-Match tuner is an extremely useful device that every QRP operator will want to have. Gathering the Parts

QRP L-Match Tuner Build - MiscDotGeek

The circuit for my tuner is given above. It follows the Z-match made by Phil Salas, ADSX, which was reported in QST January 2003 and which has been added to More QRP Power by the ARRL. The difference in my tuner is the coil is air wound and there is no extra capacitor in parallel with C 1 that can be switched in as needed.
