colleague to purchase and make bargains to download and install the molecular biology of insect disease vectors a methods manual as a result simple!

Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.
